"At boxmodel, we are **specialist software architects** that deliver bespoke business solutions to organisations across the **UK and beyond**. We work with businesses as their **software partners** to understand their business/process/workflow problems, then use the **very best of technology** to solve them. For our clients, we offer a **tried and tested end-to-end service**; from the scoping and ideas performed in our discovery workshops, all the way up to the production of a viable piece of software that will **transform your business**."

Alan Easton
Managing Director
